

# LED SHOEBOX LIGHT

## SMART 300 SERIES

### PRODUCT DESCRIPTION:

The smart LED shoebox lights represent a fusion of cutting-edge intelligent control technology with high-performance LED shoebox lights. These lights are designed for use in a variety of settings, including parking lots, driveways, outdoor sports courts (basketball, tennis, volleyball, etc.), and other commercial and industrial locations that demand high brightness.

Enabled by Bluetooth mesh technology and an intelligent control system, these lights offer a range of features such as energy consumption monitoring, brightness adjustment, schedule management, motion detection, and group control. Users can conveniently operate these functions through a dedicated app or SaaS platform.

### CONTROLS:

- Bluetooth Microwave Motion Sensor
- Zhaga BOOK18 Bluetooth PIR Sensor

### DIMENSION DRAWING:

### FEATURES:

- Photocell Control Optional; 100-347vac Optional
- Lumileds LED high luminous efficiency and long life
- Base on Morlink / Silvair Bluetooth Wireless Control
- Excellent optical design, greatly improve the utilization and evenness
- IP65, suitable for wet locations.
- Cast aluminium design, better cooling and easy replacement
- Compliant with US and Canada or CE codes
- Superior efficacy meets DLC Premium requirements.

### APPLICATIONS:

- Commercial and industrial places with high brightness requirements such as parking lots, lanes, outdoor courts (basketball, tennis, volleyball, etc.)
- Operating Temperature -40°F to 122°F (-40°C to +50°C)

### WARRANTY:

- 5-year standard warranty

# Our Smart Lighting Solutions

## MORLINK

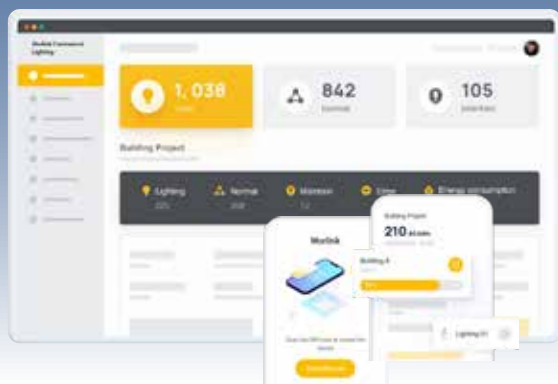

Complete Businesses  
Smart Lighting Solution

**01** Multi-application platform design, integrating Bluetooth, Zigbee and WiFi wireless general technology can realize equipment group control, equipment monitoring and fault diagnosis, scene management, and automation, etc.

**02** Users can share lighting equipment by equipment category or area on the Morlink SaaS platform, and scan the equipment sharing QR code through the Morlink applet for remote control.

**03** Support visual management of equipment, large-scale data analysis, user authorization and allocation, site mapping and configuration, and unified management of multiple projects.

## SILVAIR

Reliable and energy-efficient  
lighting control solution

Silvaire Intelligent Lighting Control System is a wireless lighting control system that uses Bluetooth mesh technology to enable advanced lighting control capabilities. Compared to other competitors in the market.

### Compatibility

Compatible with more devices including DALI and 0-10V interfaces. Can be easily integrated into existing lighting infrastructure without major changes.

### Capabilities

More advanced lighting control functions can be integrated with other building automation systems to provide a comprehensive solution for intelligent lighting control.

### Interface

Friendly interface: Intuitive user interface, can easily control and manage their lighting system and provide configuration and customization services to meet specific user needs.

### Scalability

Highly scalable and can be easily expanded as lighting needs grow. This makes it an ideal solution for both small and large-scale projects.
