

LED UFO High Bay Light

SMART 3101 SERIES

FEATURES:

- High quality drivers 100-277Vac / 120-347Vac available
- Fins design, advective holes and grooves in each fin, good for heat dissipation
- Base on Morlink / Silvair Bluetooth Wireless Control
- Professional light distribution technique, high light reflectivity reflectors
- The lens pass rate is over 90%
- Compliant with US and Canada or CE codes
- Light weight and small size, save about half shipping costs.

PRODUCT DESCRIPTION:

LED UFO High Bay Light 3101 series provides high efficiency up to 150 LM/W. The fixture has 4 installation options to adapt to different installation conditions. The one-piece die-cast aluminum shell is adopted to ensure the quality while also exerting good heat dissipation. Through Bluetooth meshed technology and intelligent control system, CCT / brightness adjustment, schedule management, motion detection and group control can be operated on App or SaaS.

CONTROLS:

- Bluetooth Microwave Motion Sensor
- Bluetooth PIR Sensor

APPLICATIONS:

- Warehouses, Factory
- Exhibition Room, Gas Station, Supermarket
- High Bay and Low Bay applications
- Operating Temperature -40°F to 158°F (-40°C to +70°C)

WARRANTY:

- 5-year standard warranty

DIMENSION DRAWING:

Our Smart Lighting Solutions

MORLINK

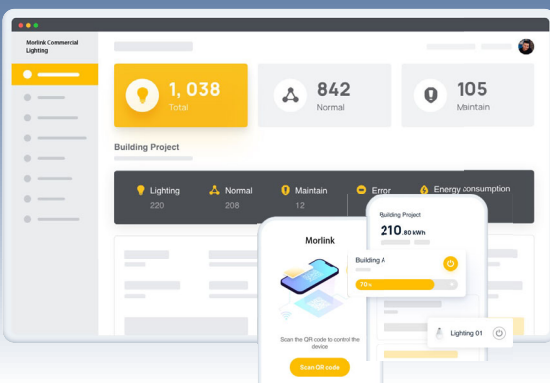

Complete Businesses
Smart Lighting Solution

01 Multi-application platform design, integrating Bluetooth, Zigbee and WiFi wireless general technology can realize equipment group control, equipment monitoring and fault diagnosis, scene management, and automation, etc.

02 Users can share lighting equipment by equipment category or area on the Morlink SaaS platform, and scan the equipment sharing QR code through the Morlink applet for remote control.

03 Support visual management of equipment, large-scale data analysis, user authorization and allocation, site mapping and configuration, and unified management of multiple projects.

SILVAIR

Reliable and energy-efficient
lighting control solution

Silvaire Intelligent Lighting Control System is a wireless lighting control system that uses Bluetooth mesh technology to enable advanced lighting control capabilities. Compared to other competitors in the market.

Compatibility

Compatible with more devices including DALI and 0-10V interfaces. Can be easily integrated into existing lighting infrastructure without major changes.

Capabilities

More advanced lighting control functions can be integrated with other building automation systems to provide a comprehensive solution for intelligent lighting control.

Interface

Friendly interface: Intuitive user interface, can easily control and manage their lighting system and provide configuration and customization services to meet specific user needs.

Scalability

Highly scalable and can be easily expanded as lighting needs grow. This makes it an ideal solution for both small and large-scale projects.
